

InfiniteCooling

Field Engineer

Infinite Cooling's mission is to mitigate water scarcity around the world. We help power plants and other industrial plants reduce their water consumption and water treatment costs by recovering water from their cooling tower exhaust. We have a patented technology developed at MIT that uses electric fields to capture water from the plumes leaving cooling towers. We are a vibrant startup based in the Boston area, and we are on a mission to be a global leader in the water services industry for industrial applications. Infinite Cooling is venture-backed and has raised over \$16M of capital and was awarded over \$3M of prizes and grants.

We are looking for a sharp, reliable, and detail-oriented Field Engineer to join our team. Responsibilities will include working with our installation team, on-site testing of product deployments and overseeing on-site maintenance of existing systems. Strong communication and attention to details will be essential skills for a successful applicant.

What you will do:

- Install and inspect new equipment and upgrades
- Direct on-site teams and contractors. Monitor labor time and materials costs.
- Create and maintain site logistics plans
- Resolve on-site issues after installation
- Coordinate and conduct testing
- Oversee maintenance events (small and large)
- Write maintenance reports and keep logs on different product deployments
- Diagnose equipment failures and issues with engineering team
- Feed information from field back into design changes with engineering team
- Interface and build strong relationships with customer personnel

About you:

- You have unwavering personal integrity and work ethic
- You are proactive and productive – you complete tasks in a timely manner
- You are adaptable and excel working in a fast-paced dynamic environment
- You are a great communicator
- You have a problem-solving mindset and attention to detail
- You approach all tasks with a safety-first mindset

Qualifications:

InfiniteCooling

- AS degree in technical field required. BS degree preferred
- 3+ years field work experience in an industrial, utility environment (construction, equipment installation and start-up or maintenance and troubleshooting etc.)
- Understanding of engineering documents such as drawings, specifications, and standards
- Experience operating industrial site equipment (manlifts, scissor lifts, forklifts, etc.)
- Familiar working with standard safety protocol in industrial settings including lockout tagout procedures
- OSHA 30 (preferred), OSHA 10 (required)
